

# Description

Elma's latest AdvancedTCA chassis platform handles even the toughest cooling challenges by providing up to 500 watts per slot cooling (see simulation report). The riveted construction makes the chassis strong yet easy to manufacture in volumes, thereby controlling costs. Designed to meet NEBS and EMC compliance requirements.

The chassis ships with a 14-slot, dual star 40GigE backplane.

## **Features**

- Holds up to 14 AdvancedTCA blades
- 500W per slot cooling capability
- Dual plug-in shelf manager
- -48 VDC input
- Power Interface Board (PIB) to minimize wiring
- Removable cable management bracket
- NEBS compliant air filter
- Front and rear ESD jacks
- Meets NEBS shock and vibration requirements
